SUMMARY

Software Developer with experience in Java, Spring Boot, REST APIs, SQL, and enterprise application development. Currently working on backend systems, authentication services, and code generation frameworks at AUMLabs. Skilled in designing scalable applications, developing RESTful services, database integration, software testing, and Agile development practices. Passionate about building robust backend systems using Java and Spring technologies.

TECHNICAL SKILLS

- **Languages** : Java, SQL, JavaScript.
 - **Backend** : Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT Authentication.
 - **Frontend** : React.js, HTML5, CSS3, JavaScript.
 - **Databases** : PostgreSQL, MySQL, MongoDB.
 - **Tools & Platforms** : Git, GitHub, Postman, JIRA, Maven, Gradle.
 - **Testing** : JUnit, Selenium WebDriver, API Testing.
-

WORK EXPERIENCE

Jr. Associate Technology – AUMLabs | Nov 2025 – Present

- Contributing to enterprise software development and application modernization initiatives.
- Developed REST APIs and database integrations for enterprise applications using Java, Spring Boot, Spring Data JPA, and PostgreSQL.
- Developing authentication, authorization, and user management modules using Spring Security and JWT.
- Developed metadata-driven code generation frameworks that automated creation of entities, DTOs, repositories, services, and controllers, reducing repetitive development effort.
- Debugging, testing, and enhancing application performance and maintainability.
- Collaborating with development teams in an Agile environment using JIRA and Git.

RPA Developer Intern – AutomationEdge | Apr 2025 – Sep 2025

- Developed automation workflows for healthcare and BFSI business processes.
 - Built automation solutions for insurance eligibility verification using AutomationEdge Process Studio.
 - Implemented validation logic, exception handling, and workflow optimization.
 - Performed plugin testing and defect validation to improve platform reliability.
 - Collaborated with QA and development teams to ensure solution quality.
-

PROFESSIONAL PROJECTS

Object Factory & Code Generation Platform | Java, Spring Boot

- Designed and developed a metadata-driven Object Factory platform for rapid enterprise application development.
- Built code generators capable of automatically generating entities, DTOs, repositories, services, controllers, and application structures.
- Implemented support for nested object relationships and multi-level object hierarchies.
- Developed configurable code templates to reduce repetitive development effort.
- Improved development productivity by automating boilerplate code generation for enterprise applications.

Authentication Service (TTC Platform) | Java, Spring Boot, Spring Security, JPA, PostgreSQL

- Developed a centralized authentication and authorization service using Spring Boot.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC).
- Designed REST APIs for user registration, login, user management, and access validation.
- Developed repository, service, and controller layers using Spring Data JPA.
- Implemented optimistic locking and version-based update mechanisms for data consistency.

Ohioans Medicaid Portal Automation| AutomationEdge, SQL

- Developed healthcare automation workflows for insurance eligibility verification.
 - Implemented validation logic and exception handling mechanisms.
 - Improved process efficiency and reduced manual verification effort.
-

EDUCATION

Master of Computer Science | K J Somaiya College of Arts and Commerce | Jun 2022 – Jul 2024

Bachelor of Computer Science | K J Somaiya College of Arts and Commerce | Jun 2019 – Apr 2022

CERTIFICATIONS

Automation Edge Foundation - AutomationEdge
